

NILANSHA PANDEY

B.Tech Computer Science Engineering Student
Lucknow, India | +91-6389489942 | nilansha777@gmail.com
GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Computer Science undergraduate with strong interest in Artificial Intelligence, Machine Learning and Data-Driven Systems. Experienced in developing full-stack web applications, AI-based systems and data processing tools using Python, JavaScript and modern frameworks. Skilled in applying algorithms, databases and system design to build scalable solutions. Actively participates in national hackathons and technical competitions. Seeking research internship opportunities to contribute to innovative computing research.

EDUCATION

B.Tech in Computer Science and Engineering

University of Lucknow | 2024 – 2027 (Pursuing)

CGPA: 8.16 / 10

Diploma in Engineering

Government Polytechnic Gorakhpur | 2021 – 2024

Intermediate (Physics, Chemistry, Mathematics)

Shivaji Inter College, Deoria | 2021

High School

Shivaji Inter College, Deoria | 2019

TECHNICAL SKILLS

- Programming: Python, JavaScript, C, SQL
- Web Development: HTML, CSS, React.js, Django, REST APIs
- Databases: MySQL, PostgreSQL, SQLite
- Tools: Git, GitHub, Linux, VS Code
- Core CS: Data Structures, DBMS, Operating Systems, Computer Networks

RESEARCH INTERESTS

- Artificial Intelligence
- Machine Learning
- Computer Vision
- Data Science
- Intelligent Web Systems

SELECTED PROJECTS

Brain Tumor Detection System

Developed an AI-based brain tumor detection system using deep learning (ResNet-18) for medical image classification. Trained the model on a brain MRI dataset (BRATS) to accurately identify tumor regions. Applied image preprocessing, feature extraction, and CNN-based techniques to improve model performance and reliability. Technologies: Python, Deep Learning, ResNet-18, OpenCV, PyTorch [View on GitHub →](#)

Smart Health Assistant

Developed an AI-based health recommendation system that analyzes symptoms and provides basic health insights using machine learning models. Implemented backend services using Django and integrated patient data management with SQL databases. Technologies: Python, Machine Learning, Django, MySQL [View on GitHub →](#)

Face Recognition System

Implemented a real-time facial recognition system using computer vision techniques for identity verification. The system processes video streams and detects faces using OpenCV and machine learning models. Technologies: Python, OpenCV, Machine Learning [View on GitHub →](#)

EduPlay – Interactive E-Learning Platform

Developed a web-based learning platform with gamified quizzes, achievement tracking and progress analytics to improve learning engagement. Technologies: JavaScript, Django, Bootstrap [View on GitHub →](#)

CodeNest – Collaborative Coding Platform

Built a real-time collaborative coding environment that allows multiple users to edit code simultaneously using WebSocket communication. Technologies: React, Node.js, WebSocket [View on GitHub →](#)

CERTIFICATIONS & ACHIEVEMENTS

- Cisco Certified Network Associate (CCNA)
- Participant – Smart India Hackathon
- Participant – Unstop Hackathon
- Participant – EY Tech Hackathon

ADDITIONAL SKILLS

- Full-Stack Web Development
- REST API Development
- Database Design and Optimization
- Version Control using Git & GitHub
- Problem Solving and Algorithmic Thinking
